Experience

Data Scientist Intern — *Datamole, Prague*JUL 2018 – PRESENT

Worked on projects in various fields including reinforcement learning, time series prediction, anomaly detection and real-time visual object detection. Used Jupyter, NumPy, Pandas, Scikit-learn, Tensorflow, OpenCV.

Software Engineering Intern — Blue Vision Labs, London

JUN-SEP 2017

Back-end development for Blue Vision Labs, a computer vision startup. Worked in a team, but independently to a high degree. Primarily wrote TypeScript and Python, with occasional C++ and SQL. Was also involved in the hiring process.

External developer — RTSmunity, Prague SEP-DEC 2016

Back-end Node.js development for RTSmunity.

Java teacher — Stanice techniků Vyšehrad, Prague SEP 2015 – JUN 2017

Leading the hobby group *Advanced Java* for children ages 12–15.

Education

Charles University — *Prague*

2017 - PRESENT

Studying **computer science** at the Faculty of Mathematics and Physics. Perfect grades as of time of writing.

Studied **philosophy** at the Faculty of Arts during the 17/18 academic year.

Skills & Abilities

Programming since an early age. Adept at **Python**, C++, **JavaScript**, **TypeScript**, **HTML** and **CSS**. Knowledge of **Haskell**, **Java**, **SQL**, **Go**, **Matlab**.

Knowledge of **Git, Jupyter Notebook, Docker, AWS, GCP, TensorFlow, Pandas**, among others.

Strong algorithmic thinking proven in programming contests.

Long-time **Linux** user; knowledge of **Bash** and the terminal in general.

Driver's Licence — class B (passenger cars)

Languages

Czech — native

English — fluent (C2 — CAE Grade A)

German — B2

Competitive programming

Wrote 10,000s of lines of C++ during algorithmic programming contests

ACM-ICPC

56th place at **ACM-ICPC World Finals 2018** (only about 400 out of over 46 000 students advance to this round), **6th place** at Central European Regional Contest (CERC) 2017,

12th place at CERC 2016 (unofficial participation)

Google Code Jam

143th place in 2018, **107th place** in 2016. Over 20 000 contestants participate each year.

Olympiads

Gold medal (15th place) at the International Olympiad in Informatics 2016

2nd place at the Czech Programming Olympiad (MO-P) 2017

1st place at the Czech Programming Olympiad (MO-P) 2016

Codeforces

In the **top 2%** contestants on Codeforces, the most popular competitive programming platform

Projects

acres — barcode sharpening 2018

A machine learning model for sharpening blurry images of barcodes. Based on convolutional neural networks, implemented in TensorFlow, trained on Google Cloud Platform.

Samorozvrh — schedule optimization

OCT 2017 - FEB 2018

A web app which helps students create their schedule by selecting the times of courses, using a constraint programming solver. Includes JS frontend, Go backend and Python schedule optimizer.

Blekota — neural network sound generation DEC 2016 – MAR 2017

Using a recurrent neural network, Blekota generates sound mimicking given input sounds. Implemented in pure NumPy, including manually computed derivatives and the RMSprop gradient descent algorithm.

Sup — schedule-tracking app

An Android app that automatically tracks changes in students' schedules. Currently at over 600 total installs.
